

Democrats Anxious for New Leader, but Wilson Has Votes to Dominate

***Wilson Poses for Photographer
Causing More Third-Term Talk***

From The Tribune's Washington Bureau

WASHINGTON, June 20.—Strength was added to the popular belief here that President Wilson will be a third-term candidate before the San Francisco convention when it became known to-day that the President posed for half an hour yesterday in his study for a commercial photographer. It is believed the new photograph of the Executive will be used to disabuse the public mind of any doubt about Mr. Wilson's physical appearance, and in a measure supplement the description of the President carried so fully in the story.

It also developed that the President has not definitely given up the idea of leaving Washington this summer for some cooler climate, although it was made certain that the Executive will remain in the White House during the sessions of the Democratic National Convention. All facilities have been arranged to keep him in constant telegraphic touch with the convention city.

Gang Finds Yellow Substance in Quarry and Metallurgist Will Make Test

Special Dispatch to The Tribune
OSISING, N. Y., June 20—Singer

ing is on the verge of a "gold rush." Members of the "honor gang," excavating for the new prison in the quarry across the street from the old building, came upon a vein of yellow metal. The "Sing Sing Bulletin" will say in its issue of to-morrow:

Recently men at work on the construction of the new reservoir came on a lump of yellow substance that looks so much like gold that it has been sent to a metallurgist to be assayed. Gosh! If it should turn out to be the real stuff, what a mob of prospectors will come flocking to Sing Sing!

There is a tradition that while contacts were taking out stone for the state Capitol they found gold and iron paying quantities."
